

Dear FCC,

Please reject the NAB petition 04-160 limiting the ability of satellite radio to broadcast local content. To start, to do so would seem to limit rather than promote market competition and would seem to elevate the FCC's involvement even more than it currently is involved in our nations broadcast content. In addition, this is a service (local traffic and weather) that I have found far more accurate and reliable than that provided by traditional radio stations. Overall, I feel the FCC should reject this or subsequent petitions.
